Eco So Quick Soak Off Pink & White Gel Kit

A longer lasting alternative to polished French manicure!

Valencia, CA – September 1, 2009

Semi permanent manicure and pedicures are becoming one of the most asked for services in salons today. The Soak off gel is a great alternative to a French picture perfect polished look! The gels last weeks longer than traditional polish. The gel coat shrink-wraps itself around the nail giving it a coating that is strong yet flexible and gives nails an overlay topcoat with less chipping or peeling. The soak off gels are great for use on natural nails, gel and acrylic over lays.

The soak off gel contains self-leveling properties to make for a smooth and easy application with no lifting and a super glossy finish with no use of a topcoat! The soak off gel is what the industry calls a “soft gel” compared to the traditional gel—it flexes with the nail giving less chance of chipping and cracking. The gel can be broken down and removed with the conditioning & hydrating All Season Nails soak off solution. Changing your gel just got a whole lot easier, they soak off within minutes!

The kit contains: 1/8oz. Pink, White, Shimmer, Clear and a 2oz. finishing wipe to take off any tacky layer that is left behind by gel. We also have a series of new soak off colored gels in a kit. The new kit offers 8-1/8oz sizes of Black Sand, Plum Pacifica, Garden of Eden Red, Moonlight Shimmer, Pink Coral, Paradise Purple, Barefoot Pink & Base coat. Position yourself as a gel-a-oholic! Get your clients addicted to the latest trend to hit salons and spas with a moneymaking alternative to polish! Offer this service now!
