Vamp Up Your Style This Season with New Vamp Tips

The first tapered fashion forward nail tip in the industry!

Valencia, CA – October 1, 2009

The new seductress style of Vamp nail tips will leave your clients with an ever-lasting impression! These Russian inspired tips are fashion forward and easy to wear. This is a style that sweeps the hottest designer models fingertips at runway shows...until now! Russian nail trends are really starting to take notice globally and changing the way nail techs are doing nails for covers of some of the leading nail magazines in the industry. This edgy new style has really created a statement and a fashion forward approach to the traditional acrylic nails!

Star Nail has created a new style nail tip called Vamp.

This tip has become one of the most tempting tips of the line. The unique feature of the tip contains an extremely slender apex point at the tip and the deep c-curve of the free edge. A strong and quality adhesion is the key to a full set of nails that will last until the next visit to the salon without lifting or breaking and is vital to any nail technician's repeat business. This style of tip is available in a 360-count pack with sizes 1-10 and individual sizes in a 50 count. The mixes of tips are available in clear to make them versatile with any type of style acrylics. Star Nail International uses the highest grade of ABS plastic. The ABS plastic flexes with the nail so it won't crack or break with everyday use. ABS plastic is not a recycled plastic. When plastic is recycled, the plastic tends to be weaker and snap or break very easily.

The versatile tip is great for competitions. With the well less design, this tip can adhere to any nail plate quickly and easily. Create a perfect competition nail in half the time of regular nail tips. This tip is also thin so you have the ability to build product over the tip without it looking too thick. With the crisp clean clear tip nail technicians are able to have the freedom of creating a clean looking set of original nails. For more great tips available at your fingertips, log on to www.starnail.com to order direct or to find the nearest Star Nail International Dealer to you!
